Morris Hatalsky

Presented by the Electrical Industry

Open to All

PLAY WITH THE PROS THIS YEAR!

Event Information

When

Monday, August 21, 2006 6:30 a.m. Registration, 7:45 a.m. Shotgun Start

What

Join us for another chance to play with the pros! The tournament's new name reflects pro golfer Bob Gilder's commitment to the event. He'll again invite his fellow pros to the Pumpkin Ridge courses for an outstanding day of golf for a wonderful cause!

The Platt Golf Challenge is a best ball scramble golf tournament. Sixty-three foursomes will compete for the lowest score

over 18 holes of golf at the two beautiful courses at Pumpkin Ridge Golf Club: Witch Hollow Course (private side) and Ghost

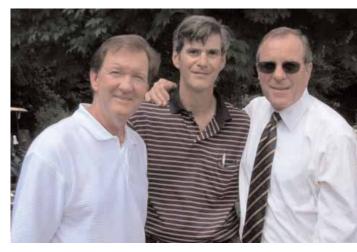

Creek Course (public side). There will be team photos, a longest drive and closest to the pin contest. Before the tournament begins, there is a continental breakfast and a warm-up. A reception, awards luncheon, and auction complete this fantastic event.

Where

Pumpkin Ridge Golf Club: Witch Hollow Course (private side) and Ghost Creek Course (public side): 12930 Old Pumpkin Ridge Road, North Plains, OR 97133

Benefiting The Cystic Fibrosis Foundation, Oregon Chapter

- Company name displayed on tee sign
- Half-page advertisement in program
- Opportunity to sponsor KP or LD

Individual Golfer, Witch Hollow Course

(Private Side) (\$800)

■ One player spot in the tournament on Witch Hollow Course

Individual Golfer, Ghost Creek Course

(Public Side) (\$550)

■ One player spot in the tournament on Ghost Creek Course

About Cystic Fibrosis

Mission and Purpose

The Cystic Fibrosis Foundation was established in 1955 to raise money for research to find a cure for cystic fibrosis (CF) and to improve the quality of life for the 30,000 children and young adults with the disease.

The Cystic Fibrosis Foundation

- Actively supports the advancement of medical science by funding its own network of CF research centers at leading universities and medical schools throughout the United States. By applying state of the art science to target research opportunities, these centers are bringing us closer to a cure. The Cystic Fibrosis Foundation was the first voluntary health agency to create and fund such a network.
- Accredits and finances 115 CF Care Centers nationwide, including one at OHSU, which provide high-quality, specialized care for those with CF. These centers, located at major teaching and community venues, offer comprehensive diagnosis and treatment for people with CF and their families. Professional medical education and training are offered at both research and care centers.
- Supports extensive clinical trials at its Care Centers to test new CF drug therapies, including ways to fight respiratory infection, thin the CF mucus, and reduce inflammation.
- Advocates for increased funding for the National Institutes of Health and testifies before the U.S. Congress to encourage more federal investment in basic science research. The foundation works closely with Congress, the Food and Drug Administration and pharmaceutical companies to speed the development of drugs to treat cystic fibrosis.
- Supports extensive clinical trials to test new CF drug therapies, including ways to fight respiratory infection, thin the CF mucus, and reduce inflammation. For the first time, CF Foundation-supported researchers are targeting the root cause of the disease, rather than just the symptoms.

The Cystic Fibrosis Foundation depends upon public support to carry our its life-saving programs. The generosity of donors has enabled scientists to identify the gene that causes CF and to correct defective CF cells in laboratory dishes. Based on these successes, Foundation-supported researchers are now conducting gene therapy studies involving individuals with CF, using several unique gene delivery methods. This new gene transfer therapy technology may ultimately lead to a cure.

The Cystic Fibrosis Foundation was recently ranked as one of the nation's top ten "charities you can trust" in SmartMoney, the magazine of the Wall Street Journal. In other words, the CF Foundation puts your money to work as efficiently as possible. The Foundation is proud to receive such recognition and will continue to pay big dividends in terms of medical advances.

For further information about volunteer opportunities or donations, please call 503.226.3435.

Because of risks to people with cystic fibrosis (CF), individuals with a confirmed positive sputum culture for Burkholderia cepacia complex shall not attend this event. This is because B. cepacia can be passed between individuals who have CF through close proximity. B. cepacia infection in a person with CF can cause serious respiratory illness and, in some patients, may lead to death. Despite this policy, there might still be some individuals with B. cepacia in attendance. B. cepacia is not a risk for otherwise healthy individuals. For alternative ways to participate and for information about this policy, please contact the CF Foundation at (800) FIGHT-CF or visit our Web site at www.cff.org. Consult your CF care center physician with medical questions.
